

SSP opens SKALA Business lounge at Larnaca International Airport

SKALA Business Lounge at LCA

SSP has partnered with [Cyprus Airports F&B](#) to open the SKALA Business Lounge at Larnaca International Airport ([LCA](#)). The new lounge welcomed its first visitors on June 20 in a space that combines modern comfort with Cypriot charm.

The SKALA Business Lounge offers a quiet area with connectivity and space for business travellers to work. A family zone for younger travellers and includes video game consoles and other entertainment options. The cuisine in the lounge includes plenty of classic Cypriot dishes.

Travellers can enjoy an order-at-table option which allows them to order food and drink from the comfort of their seat. All seating is equipped with power and USB ports for charging devices.

The lounge has seating for 400 visitors, including 80 seats outdoors. A staffed welcome desk and bar ensures guests receive a warm greeting to the lounge upon arrival.

“The new ‘SKALA’ Business Lounge with its unique design and exceptional levels of comfort, coupled with panoramic views of the runway and Larnaca’s Salt Lake, offers those departing from Cyprus the perfect opportunity to enjoy the hospitality and cuisine for which the island is famous. We at SSP aim to make a visit to one of our bars or restaurants the best part of the journey, and we’re certain that this lounge will do much to help us achieve that purpose here in Cyprus. The lounge market offers much scope for development and we’re looking to expand our portfolio of lounges in this region and beyond,” said George Antoniou, Managing Director for SSP Eastern Europe and Middle East.
