

Airbus selects Kaelis to enhance Airspace Customer Showroom

[Kaelis](#) has been selected by [Airbus](#) to collaborate on a cabin refresh project for the Airspace Customer Showroom in Toulouse, France, a flagship facility showcasing the future of aircraft cabin innovation.

The collaboration positions Kaelis as a trusted design partner, supporting Airbus with updates to key cabin mockups and decorative elements within the showroom. Drawing on its expertise in cabin product development and onboard customer experience design, Kaelis will contribute to elevating the visual and experiential impact of the space.

“Being selected to work with Airbus on such an iconic and forward-looking project reflects the trust in Kaelis’ expertise in onboard aesthetics, passenger experience and product realism,” said Renival Oliveira, CEO of Kaelis. “This project is not only a showcase of premium design, but also a step forward in shaping the future of cabin environments.”

Kaelis’ work aligns with Airbus’ vision for refined and realistic cabin spaces, incorporating high-quality, lifestyle-driven elements such as tableware, amenity kits, accessories and decorative features designed to reflect modern luxury, passenger well-being and brand storytelling.

The partnership marks another milestone for Kaelis as it continues to expand its role in delivering end-to-end onboard solutions across the aviation sector.
