

Tapis and Ultrafabrics showcase colour knowledge with Pantone

A look at Pantone's colour swatches

[Tapis Corporation](#) examined [Pantone](#)'s Color of the Year in a LinkedIn update recently, praising the unique hue. The company's mill partner, [Ultrafabrics](#), has partnered with Pantone to showcase the internal design and colour knowledge for cabin interior design.

Pantone's colour of the year for 2024 is Peach Fuzz (PANTONE 13-1023) which is a warm and cozy shade that provides a softness passengers might not expect to see inside the cabin.

Last year's colour of the year from Pantone was Viva Magenta, a vibrant shade that added a splash of colour to aircraft interiors. The company called the 2023 colour of the year an "attention grabber" while the 2024 colour promotes a feeling of sanctuary. This will mark the second year that Ultrafabrics partners with Pantone.

"From blue to grey, from black to white, from Viva Magenta to Peach Fuzz, our mill can provide you with the perfect colour fit for any interior," Tapis Corporation said in the social post.
