

deSter to showcase global manufacturing, local excellence at IFSA

At IFSA, deSter will showcase reusable Economy Class cups, pressboard cutlery and a curated selection of textile parts

[deSter](#) will be highlighting its commitment to local production, design excellence and sustainability at IFSA booth 637 this week.

deSter tells *PAX International* it will focus on three key pillars:

- **Innovative product portfolio:** Serving more than 80 airlines worldwide, deSter combines global expertise with a deep understanding of local market needs to deliver award-winning solutions that balance functionality, aesthetics and sustainability
- **Market-relevant design:** The company creates products with strong market relevance, carefully tailored to cultural, culinary, geographical and operational requirements. At IFSA, deSter will showcase reusable Economy Class cups, pressboard cutlery and a curated selection of textile parts—all developed with a deep understanding of customer expectations and operational realities
- **Global manufacturing, local excellence:** With a state-of-the-art production facility in Lima, Ohio, deSter offers customers local manufacturing options for flexibility, speed and reduced environmental impact—while leveraging its ability to manufacture across three continents and source materials globally. This unique combination ensures consistent quality, supply chain

resilience and solutions tailored to regional needs

“deSter’s mission is to anticipate the needs of tomorrow while delivering solutions that meet today’s challenges,” said Jon Westerby, deSter Regional Vice President Americas “Our presence at IFSA underscores our commitment to innovation, local production in the U.S. and environmental responsibility.”
