

DKA Aerospace highlights glass racks for secure onboard storage

DKA Aerospace's glass racks provide secure, lightweight storage for airline operations

[DKA Aerospace](#) is highlighting its glass racks, providing protection for every glass onboard. Designed to help safeguard fragile glassware throughout onboard service, DKA Aerospace glass racks provide secure, lightweight storage for airline operations.

Each rack holds up to 24 glasses in individual compartments, helping limit movement and reduce the risk of breakage during handling and transit.

Constructed from lightweight polypropylene, the racks weigh 0.79 kg (1.74 lb) and feature an open design that supports airflow and easy, secure stacking.

"A practical solution designed to protect glassware while supporting smoother service," DKA Aerospace said in a LinkedIn post.
