

Linstol elevates inflight audio with Meridian headset launch

Linstol's collaboration with Meridian Audio for an exclusive headset

[Linstol](#) has announced its collaboration with Meridian Audio to introduce a new benchmark for inflight audio.

This exclusive headset reflects the very best of British audio engineering, bespoke inflight product design and a shared commitment to elevating the premium travel experience, the press release said. Purpose-built for the cabin environment, the headset has been precision-tuned to deliver exceptional clarity, depth, and detail at every altitude.

Designed with both performance and comfort in mind, this headset features:

- Linstol's tailored inflight design, ensuring a lightweight, ergonomic fit for long-haul comfort
- Meridian's renowned audio expertise, bringing more than four decades of British sound innovation to the skies.

"Our collaboration with Meridian ensures passengers enjoy an unparalleled listening experience that complements the overall comfort and luxury of their journey," said Mark Russell, Chief Executive Officer of Linstol. "We're proud to work alongside Meridian to bring this product to life. Together, we've set a new standard for inflight headsets that reflects the innovation and collaboration at the heart of the industry."

The Meridian headset launch exemplifies the role of strategic partnerships in shaping the next generation of the inflight passenger experience.
