

Linstol expands audio portfolio with the introduction of Sound by Bose

This is a special feature from the [April 2026 AIX Hamburg issue](#) of *PAX Tech*, on [page 32](#).

Jakob Levison, Global Director of Audio, Linstol

[Linstol](#) is introducing latest addition to its growing audio portfolio: Sound by [Bose](#), bringing one of the world's most recognized audio brands into the inflight environment with Sound by Bose technology.

"Premium sound onboard an aircraft is no longer just a technical feature. It is a brand defining experience," Jakob Levison, Global Director of Audio at Linstol, tells *PAX Tech*. "Especially in premium cabins, sound can elevate the journey. Audio quality becomes part of the overall sensory experience."

Renowned for its industry-leading acoustic performance, innovation and engineering excellence, Bose Corporation has long set the benchmark for premium sound experiences.

"The introduction of Sound by Bose further strengthens Linstol's commitment to delivering high-quality inflight entertainment solutions that elevate passenger comfort and satisfaction," Levison

says.

Linstol is expanding its audio portfolio with Bose's industry-leading acoustic technology

As airlines continue to prioritize differentiated onboard experiences, audio quality remains a critical touchpoint, Levison expands. By integrating Sound by Bose into its portfolio, Linstol offers airline partners access to globally trusted sound performance combined with the operational expertise, customization capabilities and supply chain reliability Linstol is known for.

The addition complements Linstol's existing range of earbuds, headsets and headbands expanding options across cabin classes while maintaining a focus on innovation, sustainability and cost-efficiency.

"Audio plays a vital role in shaping the passenger journey," Levison reiterates. "Introducing Sound by Bose technology to our portfolio allows us to combine world-class acoustic engineering with our deep 2

understanding of airline operational needs. It is about delivering premium sound seamlessly and at scale.”
