

RMT Global Partners elevates inflight cleaning experience for crew

A demonstration of the extendible mop, part of Tidy Kit from RMT Global Partners, at the IFSA Global EXPO 2024

[RMT Global Partners](#) tells *PAX International* it saw increased interest in its Tidy Kit products at IFSA Global EXPO this year.

Among its other impressive product offerings, including amenities and comfort products, tableware, cutlery and customizable Emergency Care Kits, the supplier is also a leader in offering Tidy Kits for the aircraft cabin. The kits include everything crew needs to tidy lavatory spills or messes in a safe and efficient manner: gloves, wipes, broom, dustpan and the extendible mop. The products are packed in a conveniently resealable bag equipped with a hook for easy storage off the galley floor. The airline can easily add any cleaning products to the bag, for convenient access when cleaning is needed.

“These products are usefully packed into the Tidy Kits to make cleaning easier for crew. With the extendible mop, for example, crew does not need to get on their hands and knees in the lavatory when tidy ups are required—and passengers will see that the airline has equipped crew with everything needed to keep the aircraft clean and safe for everyone, making the flight an overall better experience for everyone,” explains Richard Tuttle, Founder, RMT Global Partners.
