

SEKISUI KYDEX releases KYDEX® FST CLR

New KYDEX® FST CLR

[SEKISUI KYDEX](#) has launched its new newest product line, KYDEX® FST CLR.

KYDEX® FST CLR is a perfectly clear advanced-polymer technology that can be used as highly specialized accents or take center stage as decorative panels. It is the only fully compliant transparent thermoplastic material available on the market.

“The sky is the limit for designs with KYDEX® FST CLR. Many things we use in our daily lives utilize transparent materials, and incorporating these materials in flight is an expectation for the future of aircraft interiors,” said Ben Smalley, SEKISUI KYDEX Director of Business Development in a June 6 statement.

Smalley added, “The materials and technology are here. All it takes is the vision to make it happen.” The future is now with KYDEX® FST CLR, a clear solution for use in a variety of creative ways to move the aviation industry in a completely new direction.
