
What's Hot!: AIX Edition 2

By **PAX Tech** on | Cabin Equipment

This is a special feature from *PAX Tech's April Aircraft Interiors Expo Hamburg 2020 edition*.

SSUL-X saf-Tglo floorpath - STG Aerospace: SSUL-X photoluminescent emergency floorpath system has edge-to-edge color that eliminates visible borders and comes in a matte or gloss finish. A variety of colors match airline brands and cabin schemes, including red for the first time. The customizable SSUL-X is easy to install, taking less than one hour for 737-800 aircraft. It builds on [STG Aerospace's](#) range of environmentally friendly, non-powered photoluminescent floorpath marking products.

Interspace Comfort System - Universal Movement: This seating system by [Universal Movement](#), a company by London-based creative firm New Territory, increases passenger comfort using a fold-out wing system on "living hinges" that fold into the upholstery. Airlines can brand the wings and embed technology. Facial recognition is being explored for future product lines.

The Airchair onboard wheelchair - Mercury Products (South) Limited: Created by engineering company Mercury Products (South) Limited, the [Airchair](#) enables passengers to arrive at their seat easily and with dignity. With 360-degree swivel castor wheels, the Airchair is easy to maneuver around the confines of an aircraft. It gives access to onboard amenities and improves the experience for all passengers. Weighing just six kilograms, the Airchair is the market's lightest onboard wheelchair. It reduces fuel cost for airlines and is easy to store.

Cobalt Unplugged - Cobalt Aerospace: [Cobalt Unplugged](#) is a 15-watt tri-coil wireless charging unit that is compatible with all Qi (wireless charging) enabled devices and blends seamlessly into interior surfaces, enhancing any cabin design and removing cable clutter. The new lightweight, slimline wireless charging unit provides more space to charge the device. It is durable and protected from damage and spills based on where it's placed.

Boom Headrest - ABC International: [ABC](#)'s Boom Headrest is revolutionary headrest, designed for passenger comfort and to enhance the flight experience in every seating position possible. The headrest can be adjust to any position that the passenger wants, eliminating the need for airlines to supply orthopedic pillows or for passengers to bring their own onboard. This reduces stiff neck, neck pain and allows passengers to rest better onboard.
