

A decade of success case study: Diskomat

This article is part of a series where World Travel Catering & Onboard Services Expo ([Diskomat AB](#)), regarded as one of the leading supplier of dishwashing area solutions for demanding applications included in flight catering units, has established its market presence in onboard catering over the last decade. Since its inception in the 1950s, the business has completed more than 2,700 projects in Scandinavia and worldwide, delivering environmentally friendly solutions to the onboard service sector, as well as restaurants and commercial kitchens to keep up with growing demand.

Since it first exhibited at WTCE in 2012, showcasing its Ware washing and handling equipment for use in onboard catering units, Diskomat has grown exponentially and is now recognized globally as one of the leading supplier of modern dish handling, providing the onboard services sector with hygienic, ergonomic, cost effective and productive equipment. As demand for Diskomat's products has increased over the years, the company has continued to expand its range; most recently with the revolutionary and unique Cart Washer WD-18CW, The Environmental Hero, and the Cart Pillar Lift CPL 240-F, both of which are in high demand in the international flight catering industry.

The evolution and diversification of service concepts - and increased demand of hygiene, waste handling and environment friendly solutions - has enabled Diskomat to take every year of WTCE in its stride to build upon its status as a company which has a long-term commitment to the flight catering industry. In particular, the business has developed a strong presence in Europe, China and Southeast Asia over the last decade, working with renowned caterers such as [Servair](#), [dnata](#), [Bangkok Air Catering](#), [Newrest](#), [Tokyo Flight Kitchen](#), [China Eastern Air Catering](#) and more.

"WTCE is a global hub for exhibiting new concepts and products, not forgetting the opportunities it brings to exchange new ideas with other industry professionals. It has certainly broadened Diskomat's network where we have established long-lasting partnerships, and may we continue to do so for the next 10 years," said Tomas Jämtander, Marketing Director Flight Catering Solutions of Diskomat.

"Watching Diskomat grow over the last 10 years has been a delight and seeing our exhibitor's businesses grow is part of what makes my job so enjoyable. I always look forward to seeing the latest products Diskomat has to offer for such a key part of the onboard services sector. The team's stand never fails to disappoint," said Polly Magraw, WTCE Event Director.

Visit Diskomat on stand 1G10 at WTCE June14 to 16, 2022.
