

AERQ announces first EASA Form 1 certification

Interior of an AERQ cabin

[AERQ](#) has announced that the first of its products recently received the EASA Form 1 certification. The company calls this a “major milestone for AERQ’s organizational readiness as an aviation player.”

“We are ready to deliver!” said Son Yob (Louis) Pak, Co-Managing Director at AERQ. “Generating this certificate is a recognition of the high standards and qualifications of our company and staff.”

The certificate is a prerequisite for aviation suppliers, to declare their products airworthy. Obtaining its first EASA Form 1 certification, various AERQ products have been approved to be operated in aircraft.

“Obtaining airworthiness and being able to use the advanced electronic signature strengthens our serious position in the aerospace market as innovation drivers and opens doors for AERQ to take off,” said Arnd Kikker, Co-Managing Director at AERQ.
