
CabinSpace LIVE tackles industry hot topics at AIX Boston

By **Rick Lundstrom** on September, 19 2018 | Events

[Aircraft Interiors Expo](#) has scheduled three sessions for its CabinSpace Live Seminar Theater next week in Boston.

"I am delighted to announce the agenda for CabinSpace LIVE this year," said Verity Newton, Exhibition Manager at Reed Exhibitions in the August announcement. "The range of topics on offer, and the industry-leading speakers delivering the agenda, will spark the imagination of visitors and exhibiting companies alike. As the world's largest fall event dedicated to the passenger experience, this year's event is one not to be missed!"

The agenda, set for September 25 and 26 will encourage the audience to share experiences relating to product developments, methodologies and materials to accomplish the best onboard interior solutions. Amongst the varied topics up for discussion, trends to be explored include:

Certification and Compliance: Designing for Regulations

This session looks at the product journey from the drawing board, through to development and finally placement on the aircraft. Looking at the place of compliance and regulation in the process, the audience will hear from experts about how to overcome challenges associated with regulation in the most time and cost-effective ways. To bring the topic to life and to learn from the experience of others, Senior Program Managers from AAR will share their experiences designing for regulation.

The session takes place on [Tuesday, September 25 from 11:00 am - 11:45am](#)

New Manufacturing Technologies - Capitalizing on 3D Printing Capabilities

This session will explore how manufacturing capabilities such as 3D printing are enabling innovative aircraft interiors products and parts without increasing costs. From differentiating business in a crowded market, to after-life use of printed parts, this session explores how to maximize the benefits of investing in 3D printing.

The session takes place on [Tuesday, September 25 from 15:15pm - 16:00pm](#)

Spatial Dynamics

This keynote discussion on spatial dynamics looks at how to maximize cabin space and make it work for passengers, operational staff and crew alike. From balancing overhead bin space with headroom and ensuring innovative technology meets passengers' ergonomic needs, spokespeople from airlines, OEMs and seating companies discuss space and its use inflight.

The session takes place on [Wednesday, September 26 from 14:00pm - 15:00pm](#)
