

## Castello Monte Vibiano and Linstol showcase innovation through immersive sound event at Mozartsäle

Guests were introduced to a silent disco-style activation, each equipped with Linstol headsets

[Castello Monte Vibiano](#) and [Linstol](#) hosted an exclusive evening event at the Mozartsäle Hamburg last night, bringing together industry guests to celebrate creativity, craftsmanship and innovation.

The event, themed “The Art of Sound,” began with cocktails and light bites, offering attendees an opportunity to connect before the evening’s immersive experience unfolded. As large doors opened within the historic venue, guests were introduced to a silent disco-style activation, each equipped with Linstol headsets that elevated the sensory experience and reinforced the event’s focus on innovation.

Mark Russell, Chief Executive Officer at Linstol, alongside Castello Monte Vibiano Owner Lorenzo Fasola Bologna and Brand Manager Claudio Castiglioni, welcomed attendees and set the stage for the evening, highlighting the concept behind the immersive sound journey.

Inside the grand hall, guests were guided through a curated audio-visual experience inspired by composer Wolfgang Amadeus Mozart. Dynamic projections transformed the venue's historic walls, creating a 360-degree environment that combined music, storytelling and visual design to striking effect.

The experience continued with live performances, as two artists took to the stage—one delivering a pole performance and the other showcasing acrobatic balancing—both synchronized to the soundtrack delivered through the headsets.

Following the performance, the evening transitioned into a more informal setting, with a DJ-led set maintaining the energy as guests continued networking.
