

Navarino Icons expands aviation collection with three onboard products

The recently launched range includes (from left to right) a Mini Raspberry Tart, a Kalamata Pitted Olive Snack and an Olive Oil Hydration Face Mask

[Navarino Icons](#) tells *PAX International* it has expanded its aviation collection with three plastic-free onboard products developed for airlines seeking to bring authentic Greek flavors and wellness-focused amenities to the passenger experience.

The range includes a Mini Raspberry Tart, a Kalamata Pitted Olive Snack and an Olive Oil Hydration Face Mask. Each is positioned for practical onboard use across catering, premium travel amenities and long-haul comfort programs.

The 11-gram Mini Raspberry Tart is individually wrapped in aluminum foil and designed for coffee service or snack offerings. Its compact format makes it suitable for all cabin classes, offering a bite-sized Mediterranean-inspired sweet option.

For savory service, the 30-gram Kalamata Pitted Olive Snack contains pitted olives packed with extra virgin olive oil. The preservative-free and liquid-free product is intended to make onboard consumption simpler while retaining the flavour profile associated with Kalamata olives.

Completing the launch is a single-use, two-milliliter Olive Oil Hydration Face Mask enriched with Navarino Icons extra virgin olive oil and Vitamin E. Designed for premium amenities, wellness kits and long-haul travel, the product responds to growing interest in natural, origin-led personal care items within the cabin.

“We continue to develop products that combine authentic Greek heritage with practical aviation applications,” the company said, adding that the collection is intended to support airlines in creating memorable onboard experiences.
